

# ORIGINS OF LIFE: SELF-ORGANIZATION AND/OR BIOLOGICAL EVOLUTION?

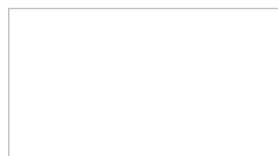

During the workshop\* "Origins of life: self-organization and/or biological evolution?", specialists in biology, physics, chemistry, mathematics, astrophysics, Earth sciences, philosophy ... developed concepts of self-organization and biological evolution which could bring new ideas to understand the origins and development of life on Earth.

This book presents the contributions of:

Francis Albarède & Jane Blichert-Toft ; Julien Dervaux & Martine Ben Amar; Hugues Bersini; Jacques Boissonnade; Stéphane Douady, Audrey Manning & B Hennion; Antonio Lazcano ; Christophe Malaterre ; Jacques Ricard ; Michèle Thieullen ; Bernard Walliser.

\* Organised on Oct. 3rd 2008, by the CNRS Interdisciplinary programme "Origins of Planets and Life" at Ecole Normale Supérieure in Paris.
